UAB Prekybos namai Waldis fertilizers comply with:
EUROPEAN PARLIAMENT AND COUNCIL REGULATION (EU) 2019/1009 of June 5, 2019, laying down rules for the making available on the market of EU fertilizers and amending Regulation (EC) No. 1069/2009 and (EC) No. 1107/2009 and repealing Regulation (EC) No. 2003/2003.

SPECIFICATION Potassium sulphate

Potassium sulphate (K₂SO₄) or sulphate of potash (SOP), is the world's most popular fertilizer. Combining Potassium (50% K₂O) and Sulphur (18%) SOP offers a high concentration of nutrients readily available to plants.

Sulphate of Potash has a very low salinity index making it the preferred potash fertilizer in areas at risk from soil salinity.

Potassium sulphate quality parameters (SOP)

	Performance	Testing result
1	Potassium sulphate (K ₂ SO ₄ soluble in water) %	95,0
2	K ₂ O soluble in water, %	50,0
3	Moisture, %	1,14
4	pH (1)	6,10
5	Electrical Conductivity (mS/cm) (1)	11.90
6	Water insoluble, %	1,0

Packing – Big-Bags 1000 kg
